Education philosophy - One of the basic philosophies in Montessori education is to develop your child's physical, intellectual and spiritual potential to its fullest. To accomplish this, each child must be provided choices. These choices are given to children in what Dr. Montessori called the "prepared environment." The Montessori classroom provides order and structure through a safe and enriching environment which allows children to learn at their own speed, according to their own capabilities, in a way that they enjoy, in a non-competitive environment.

Education philosophy - We offer classes from Junior Kindergarten to Grade 8. Established by parents and teachers, this independent elementary day school is focused on academic excellence delivered with Christian values. At our school, learning is something everyone loves to do. It is the norm rather than the exception to hear happy kids talking about how much they like school. We think this can be attributed to three things: small class sizes, exceptional teachers and enthusiastic parents. Academic excellence extends beyond simply attaining the Ontario curriculum requirements.
